

## TECHNICAL SPECIFICATION

It allows silo aeration and prevents the entry of rain or snow.  
It is designed to prevent condensation  
It is installed on special roof sectors, with a hole 300X260 mm.

## USE

Avoid condensation, evacuating tainted air from silo.

## PARTS AND MATERIALS

- 1 BODY
  - MATERIAL: Galvanized steel S280 GD Z600  
MAC e=2mm
- 2 MESH
  - Galvanized rectangular mesh with holes  
20mm that prevents the entry of birds
  - MATERIAL: Galvanized steel S280 GD Z600  
MAC e=2mm
- 3 ROOF SECTOR WITH HOLE
  - Standard roof section with a hole for the  
body installation, which avoids poking holes  
on site, facilitating assembly.
- 4 FLANGE
  - Rectangular flange to secure the body
  - MATERIAL: Galvanized steel S280 GD  
Z600 MAC e=1,5 mm
